INSTRUCTIONS FOR
MEDICATION AT SCHOOL

MEDICINE AT SCHOOL
Medicine sent to school will only be given if absolutely necessary. All medicines are stored and administered at the office. A note must accompany the medicine outlining time and dosage to be given. The medication should be clearly labelled with the child’s name. If your child suffers from a complaint such as asthma, a spare Ventolin puffer should be kept at the office. This must be clearly labelled with the child’s name, year level and dosage. No medication should be kept by your child in his/her bag.

Name of child/student.............................................................................

Grade..........................................

Medication name and form (eg liquid, capsule, ointment):
..............................................................................................................
..............................................................................................................
